

Sensory Leaf Paint

Materials:

- Leaf outline print off
- Construction paper
- Sandwich sized zip locks
- Paint
- Scissors (or box cutter)
- Pencil
- Masking tape

Directions:

1. Print off the Leaf Outline PDF. Cut out the leaves.

2. Trace the leaves onto a sheet construction paper.

3. Cut out the shape of the leaf on the construction paper. (This can be a little tedious.)

4. In the zip lock bag, squirt multiple colors of paint into the baggie. You won't need a ton but enough to push around in the bag. Gently push the air out of the bag and seal shut.

5. On one side of the construction paper, tape the zip lock bag filled with paint to the paper.

6. Flip over and let your little one push the paint around.
 - a. You can do many things with this such as: making letters, shapes, numbers, etc.

Bring your sensory leaf paint with you on your next visit to the Wilbur D. May Arboretum and Botanical Garden and get inspired by the gardens around you!
